

Content 目錄

Book 1

I Cells and molecules of life 細胞與生命分子

1	Cell structure 細胞的構造	1
1.1	Cell membrane 細胞膜	2
1.2	Endoplasmic reticulum 內質網	7
1.3	Mitochondrion 線粒體	8
1.4	Nucleus 細胞核	9
1.5	Cell wall 細胞壁	11
1.6	Chloroplast 葉綠體	13
1.7	Vacuole 液泡	13
1.8	Comparison between plant cells and animal cells 動植物細胞的比較	14
1.9	Prokaryotic and eukaryotic cells 原核細胞與真核細胞	15
1.10	Complexity of structure of organisms 生物結構的複雜性	17
2	Chemicals of life 生命的化學成份	23
2.1	Water 水	23
2.2	Inorganic ions 無機離子	24
2.3	Carbohydrates 碳水化合物	24
2.4	Lipids 脂肪	28
2.5	Proteins 蛋白質	31
2.6	Nucleotides and nucleic acid 核苷酸與核酸	35

3 Movement of substances across cell membrane 物質穿越細胞膜的途徑 38

3.1 Diffusion 擴散作用 38

3.2 Osmosis 滲透作用 39

3.3 Water potential 水勢 40

3.4 Osmosis and plant cells 植物細胞與滲透 40

3.5 Plant water relation 植物與水的關係 41

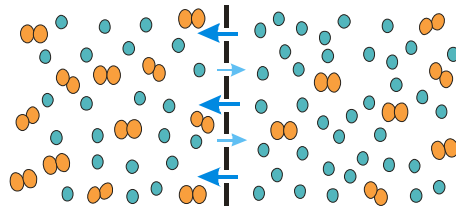

3.6 Examples of water movement in and out of cells 水在細胞間移動的例子 43

3.7 How to determine the water potential of a plant tissue 如何量度植物組織的水 44

3.8 Osmosis and animal cells 動物細胞與滲透 45

3.9 Active transport 主動轉運 45

3.10 Endocytosis 胞吞作用 47

4 Enzymes and metabolism 酶和新陳代謝 52

4.1 Catalysis and energy of activation 催化作用與活化能 52

4.2 Mechanism of enzymatic action 酶促作用的機制原理 52

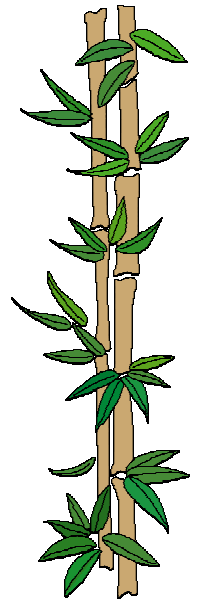

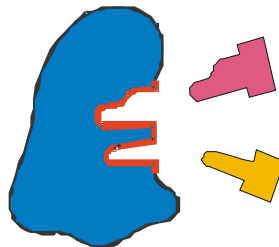

4.3 Properties of enzymes 酶的性質 53

4.4 Factors affecting the rate of enzymatic reactions 影響酶促作用的因素 55

4.5 Enzyme inhibition 酶抑制作用 59

4.6 Application of enzymes 酶的應用 62

4.7 Metabolism 新陳代謝 64

II Organisms and Environment 生物與環境

5 Food and humans

68

食物和人類

5.1 Modes of nutrition

營養方式

68

5.2 The food requirements of human

人類的食物需求

68

5.3 Balanced diet

均衡膳食

69

5.4 Factors affecting our dietary requirement

影響膳食需求的因素

74

5.5 Food tests

食物測試

76

6 Nutrition in humans

79

人的營養

6.1 The processes of human nutrition

人的營養過程

79

6.2 The human digestive system

人的消化系統

79

6.3 Ingestion of food

攝食

79

6.4 Movement of food along alimentary canal

食物在消化道中的移動

83

6.5 Digestion

消化作用

83

6.6 Absorption

吸收作用

88

6.7 Assimilation

同化作用

90

6.8 Egestion

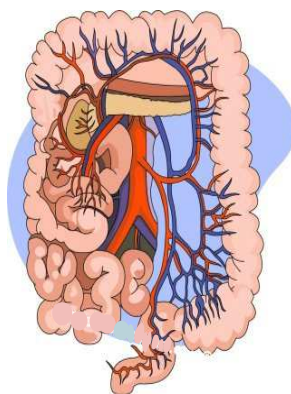

排遺作用

91

6.9 Function of the liver

肝臟的功能

91

7 Gas exchange in humans

97

人體的氣體交換

7.1 General structure of respiratory system

呼吸系統的結構

97

7.2 The ventilation mechanism in human

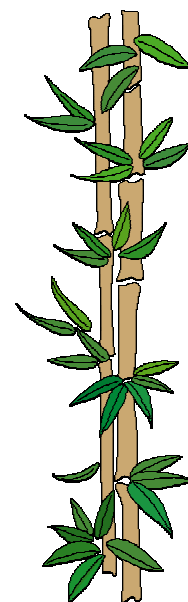

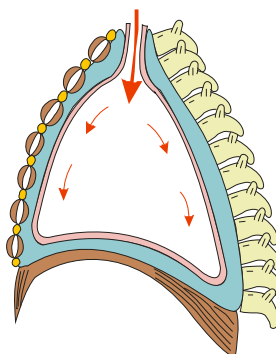

呼吸的機制原理

100

7.3 Transport of respiratory gases :

呼吸氣體的轉運

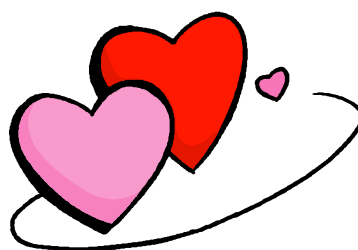

102

7.4	Control of breathing 呼吸的控制	103
7.5	Smoking and health hazards 吸煙與危害健康	104

8 Transport in humans 人體內物質的轉運 109

8.1	The transport system 運輸系統	109
8.2	The composition of blood 血液的成份	109
8.3	The heart 心臟	112
8.4	Blood vessels 血管	115
8.5	The lymphatic system 淋巴系統	120

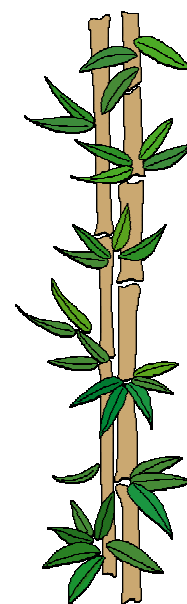

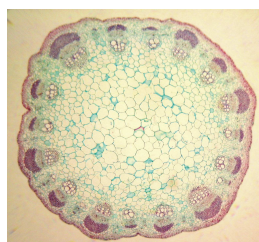

9 Nutrition and gas exchange in plant 植物的營養和氣體交換 126

9.1	Nutrition in plants 植物的營養	126
9.2	Mineral nutrients required by plants 植物的礦物質需求	127
9.3	Gas exchange in plants 植物的氣體交換	128
9.4	Factors affecting the rate of photosynthesis 影響光合作用速率的因素	133
9.5	Reagents commonly used in experiments : 實驗中常用的藥物	135
9.6	Common experiments in plant nutrition: 常見的光合作用實驗	135

10 Transpiration, transport and support in plant 植物的蒸騰、轉運和支持 144

10.1	The absorption of water and mineral in plants 植物如何吸收水分和礦物質	144
10.2	The apparatus to measure the rate of transpiration 量度蒸騰作用的儀器	146
10.3	Factors affecting transpiration 影響蒸騰作用的因素	150
10.4	Transport in flowering plants 有花植物的轉運	151
10.5	Support in plants 植物的支持作用	155

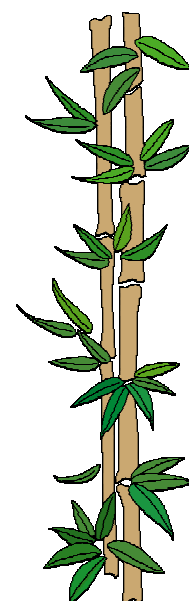

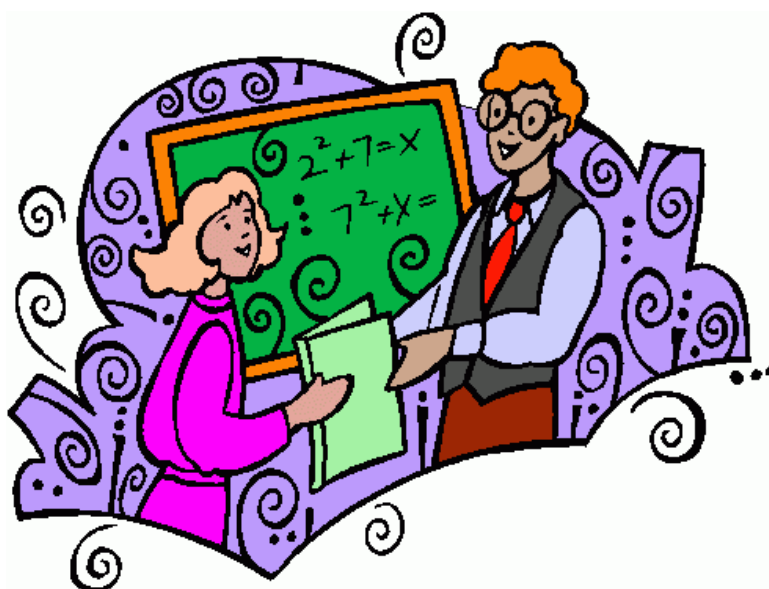

Exercise 練習

1	Cell structure 細胞的構造	160
2	Chemicals of life 生命的化學成份	163
3	Movement of substances across cell membrane 物質穿越細胞膜的途徑	165
4	Enzymes and metabolism 酶和新陳代謝	168
5	Food and humans 食物和人類	173
6	Nutrition in humans 人的營養	177
7	Gas exchange in humans 人體的氣體交換	182
8	Transport in humans 人體內物質的轉運	185
9	Nutrition and gas exchange in plant 植物的營養和氣體交換	189
10	Transpiration, transport and support in plant 植物的蒸騰、轉運和支持	193

本書練習分甲、乙兩部，甲部同學可上官網下載答案，乙部(作為家課)答案只給老師，老師請上官網申請下載密碼。

下載答案(練習及測試站): <http://www.rytc.com/seniorbio.htm>

Book 2

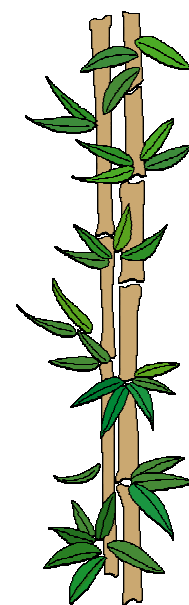

II Organisms and environment 生物與環境

- 11 Cell cycle and division
細胞週期和分裂
- 12 Reproduction in flowering plants
有花植物的生殖 (組合科學不須學)
- 13 Reproduction in human
人的生殖
- 14 Growth and development
生長與發育 (組合科學不須學)
- 15 Detecting the environment
環境狀況的探測
- 16 Coordination in human
人體的協調
- 17 Movement in humans
人體的運動 (組合科學不須學)
- 18 Homeostasis
體內平衡
- A1 Investigative experiments of SBA
校本評核之探究式實驗
- A2 How to write laboratory reports
如何寫實驗報告
- A3 A sample of laboratory report
實驗報告範例

Book 3

II Organisms and environment 生物與環境

- 19 Cell cycle and division
生物多樣性
- 20 Reproduction in flowering plants
生態系
- 21 Reproduction in human
光合作用 (組合科學不須學)
- 22 Growth and development
呼吸作用 (組合科學不須學)

III Health and Diseases 健康與疾病

- 23 **Personal health**
個人健康
- 24 **Infectious diseases**
傳染病
- 25 **Non-infectious diseases and disease prevention**
非傳染病和疾病的預防 (組合科學不須學)
- 26 **Body defence mechanisms**
身體的防禦機制 (組合科學不須學)

IV Genetics and Evolution 遺傳與進化

- 27 **Basic genetics**
基礎遺傳學
- 28 **Molecular genetics**
分子遺傳學 (組合科學不須學)
- 29 **Applied genetics**
應用遺傳學
- 30 **Evolution I**
進化 I
- 31 **Evolution II**
進化 II (組合科學不須學)

Book 4

Elective parts 選修部份

- V Human physiology: Regulation and Control**
人體生理學: 調節與控制
- VI Applied Ecology**
應用生態學
- VII Microorganisms and Humans**
微生物與人類
- VIII Biotechnology**
生物工程
